

## Brainstorming & Idea Prioritization Template

|                      |                                       |
|----------------------|---------------------------------------|
| <b>Date</b>          |                                       |
| <b>Team ID</b>       |                                       |
| <b>Project Name</b>  | A Comprehensive Measure of Well-Being |
| <b>Maximum Marks</b> | 3 Marks                               |

### Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

| S.No | Team Member      | Idea / Suggestion                                                       | Category                        | Group No. |
|------|------------------|-------------------------------------------------------------------------|---------------------------------|-----------|
| 1    | M. Sweety        | Predict Human Development Index (HDI) using Machine Learning            | Machine Learning                |           |
| 2    | P. Gowri Nandini | Develop a Flask web application for HDI prediction                      | Web Development                 |           |
| 3    | N. Yashashvi     | Perform Exploratory Data Analysis (EDA) on HDI indicators               | Data Analytics                  |           |
| 4    | M. Ruchitha      | Classify countries into Very High, High, Medium, and Low HDI categories | Classification                  |           |
| 5    | P. Malleswari    | Create interactive visualizations and evaluate model performance        | Data Visualization & Evaluation |           |

### Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

### Brainstorming & Idea Prioritization Template

| Group No. | Final Idea                                                             | Feasibility (High/Medium/Low) | Importance (High/Medium/Low) | Priority | Selected (Yes/No) |
|-----------|------------------------------------------------------------------------|-------------------------------|------------------------------|----------|-------------------|
| 1         | HDI Prediction using Machine Learning with HDI Category Classification | High                          | High                         | 1        | Yes               |
| 2         | Flask-based Web Application with Interactive Dashboard                 | High                          | High                         | 2        | Yes               |
| 3         | Exploratory Data Analysis and Model Performance Evaluation             | High                          | Medium                       | 3        | Yes               |
