Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Coding & Solution

The proposed solution has been developed using **Python, Flask, HTML, CSS, JavaScript, Bootstrap, Pandas, NumPy, Scikit-learn, and Joblib**. The application predicts the **Human Development Index (HDI)** based on user-provided socio-economic indicators.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/GowriNandini2006/AI-ML-Track
Programming Language(s)	Python
Framework(s) Used	Flask
Key Features Implemented	HDI Prediction, Input Validation, Country Selection
Pending / Incomplete Features	None
Setup / Run Instructions	Install requirements and run python app.py

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

Flask-based HDI Prediction application with clean and simple code
